

TkFast at the Wichita Area Chamber of Commerce ExpoVenture

Wichita, KS, October 6, 2005 – The first ever Wichita Area Chamber of Commerce ExpoVenture: A Wichita Business Show was held on October 6 and TkFast was there in force. The event provided Wichita's business community an opportunity to showcase its companies through booth displays and face-to-face interaction. There were 400 exhibiting booths for local businesses and more than 3,000 attendees throughout the day.

TkFast showcased our Dell Products, including a 32" Flat Panel TV, a 20" LCD Monitor, and last but not least, the Dell 3200cn Color Laser printer, which we held a drawing for and gave away to one lucky Expo visitor at the end of the day!

In keeping with our company promise of 24/7 customer support, we had our VoIP phone systems set up at the Expo to manage support calls from our clients, which also showcased the endless possibilities and flexibility our VoIP phone systems and portable office solutions can provide.

We met countless business people and learned about the wonderfully wide variety of business services and products that the Greater Wichita Area has to offer. We would like to thank all of our clients who dropped by to visit us at our booth, as well as all of our booth visitors for making the 2005 ExpoVenture a resounding success for TkFast.
