# NO BOUNDARIES

ADMS

Advanced Digital Media System

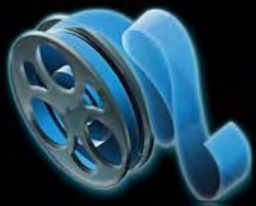

Revolutionizing the way you experience media, ADMS removes the boundaries between TV, movies, music and Internet. Exclusive WorldSearch® technology performs lightning fast intermedia searches, instantly displaying the results in a graphical onscreen menu.

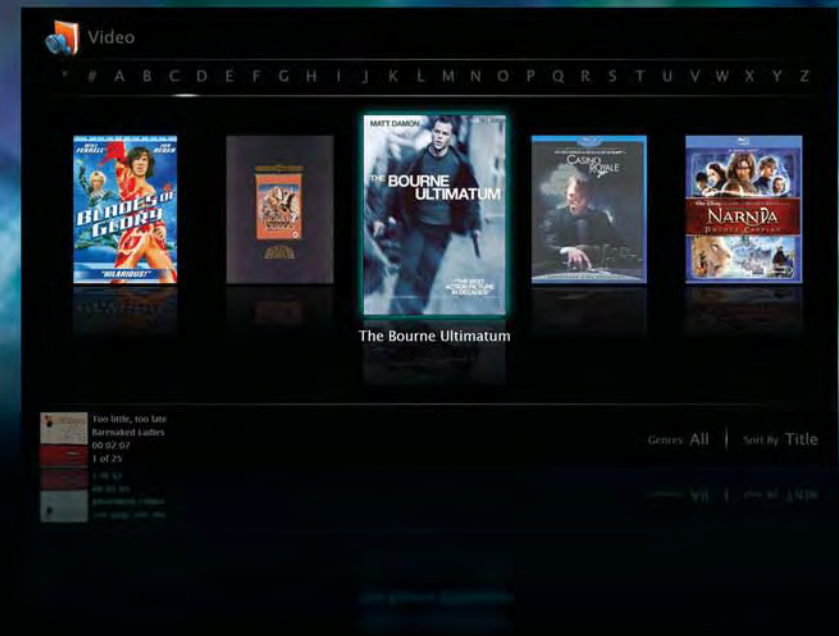

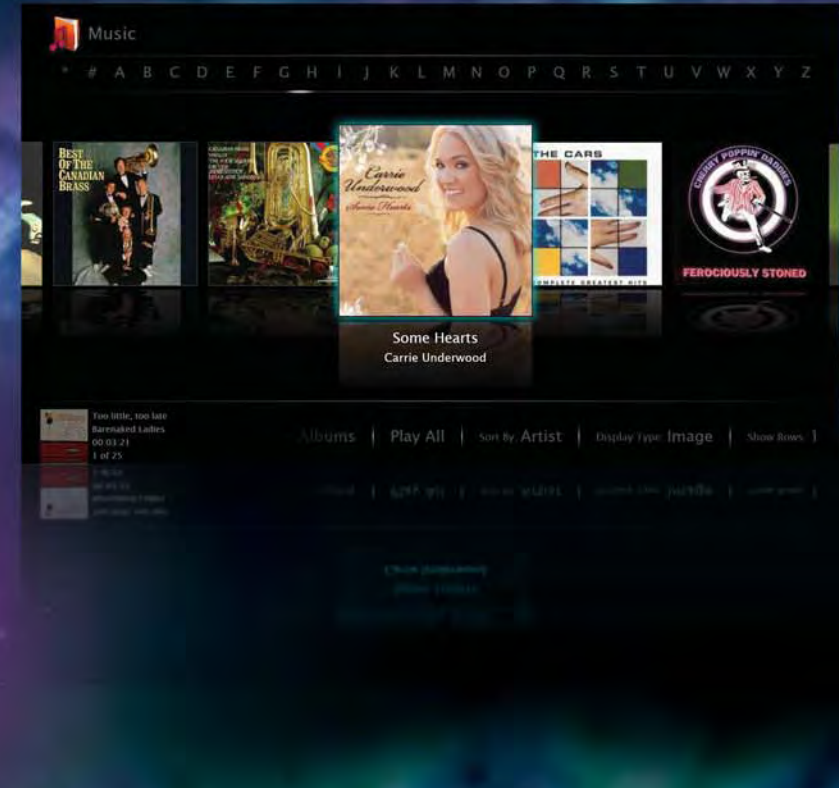

## Music

Search and play any DRM free song, podcast or audio book directly from your iTunes library through your home theater or multi-zone audio system. Search by genre, song, album and artist, preview songs before you add them to your queue and scroll through the album art, all from a conveniently located touchpanel. You never have to leave your seat or the ADMS onscreen menu.

## Video

With Video on Demand onboard, ADMS brings the largest selection of movies for rent or purchase right to your HD display. With over 40,000 titles the hottest new releases are available to rent or own without leaving your seat. Play the latest HD Blu-ray discs from either the built-in Blu-ray drive or the Crestron 200-disc Blu-ray changer capable of expansion to 1000 Blu-ray discs. The ADMS also provides an incomparable Internet TV experience, delivering instant access to the best online video content from popular sites such as Hulu, Joost, Vimeo, Metacafe, YouTube and others. ADMS conveniently delivers an enhanced Web experience in true full screen HD.

## WorldSearch

Not sure what you want? Type in a key word, using the optional wireless compact keyboard or virtual keyboard on a Crestron touchpanel, and the exclusive WorldSearch® engine collects and displays the full spectrum of available content related to that keyword.

For example, type "The Beatles" in the search bar, and the ADMS displays an array of options, including Beatles music, movies, concert footage, TV interviews, episodes from the animated series, etc. Selections are organized and displayed based on relevance and quality. WorldSearch not only delivers the content you are looking for quickly and easily, but also content you didn't even know about, but were thrilled to find.

## Internet Browser

Simple in concept, yet powerful in the experience, Crestron has created a customized browsing experience to truly bring the power of the internet to a high definition large screen. Surf the Web, check email or watch a live streaming video of breaking news or your favorite sports team in true HD like never before.
