

# Interactive Electronic Room Scheduling Display

Featuring: **Crestron's TPMC-4SM and Award-Winning RoomView® Server Edition**

Install the TPMC-4SM outside meeting rooms and communicate directly with RoomView software, via the LAN, for powerful enterprise-wide room scheduling with no required control system. The TPMC-4SM allows you to schedule meetings, reserve rooms, view room availability and review meeting calendars for any room on the network, right from the 4-inch widescreen display. Directly connected occupancy sensors detect "no shows," so even if a meeting is not cancelled or rescheduled, RoomView will automatically update the network calendar to accurately reflect current room status.

**A multi-use interface that is ultra thin, affordable, and easy to install.**

- ▶ Modern, contoured appearance
- ▶ Thin profile and small footprint
- ▶ Affordable and easy to install
- ▶ 4.3" widescreen color touchscreen
- ▶ 16-bit Isys i/O® graphics
- ▶ 800 x 480 resolution

Schedule from Outlook

Schedule from outside the room

Schedule from inside the room

Crestron's Interactive Electronic Room Scheduling Display is compatible with any of the these scheduling protocols: Microsoft Exchange, Lotus Notes and RoomView Scheduler (which does not require third party software).

RoomView® Server Edition, additionally, offers Every Room Connected opportunities.

RoomView® Server Edition is:

- ▶ The first in industry's real time, multi-user help desk software
- ▶ Complete facility network control of AV resources
- ▶ Seamless integration with Crestron's control systems & touchpanels
- ▶ Simple "at-a-glance" view of the entire control system network
